Design Specifications for Tall Buildings
Worksheet 1

Design Brief 1
To design and construct a building to be used primarily for office space. The building should be iconic and enhance the surrounding area.

Design Brief 2
To design and construct a building to be used for residential purposes, housing many people within a small area of land.

1. Make a specification to satisfy the design brief. Your teacher will tell you which brief to use.

Specification

2. Now you have learnt a bit about some different buildings, evaluate one of them against your specification. Your teacher will tell you which one to use. Which points does it satisfy and which ones doesn't it satisfy?

Evaluation
